SKILLS AND ATTRIBUTES

Project management – Leading project in corporate environment since 2009 as employee or self-employed professional within large banking organization. Reporting to bank board of directors or steering committee to present project to stakeholders. Leading construction project curling venue in Ostrava. Leading change construction project for curling venue in Prague including energy sustainability – heat pump for gas replacement.

Stakeholder Relations – As president of Czech Curling Association as a small organization I spent most of my time to create and maintain our relations towards World Curling, government, municipalities, sport authorities, partners, media and suppliers. We involve them to support and develop our sport through our strategy, good ideas or opportunities (e.g. to build clubs, venues, organize World Curling events or keep growing visibility of our sport at TV) It is important to secure and develop our government funding and find financial support for our ideas and project.

Strategic Planning – Design and Implement of Czech Curling Strategy 2021-2026. Strategy provide us continuous development in all four areas - membership and infrastructure development, sport result and youth curling, attractive curling for media, partners and fans, sustainable organization. We built this strategy 2019-2021 with external consultancy to moderate interaction with our members to define our vision, main areas, goals and action plan.
